**You're an individual  
that demands the  
unconventional.  
You have your own  
distinctive style.**

Make a clear statement in the universal language of colour and express your unique personality.

Tailor make your Cobra seat to reflect your character.

The signature range is available on all Cobra Seats and allows you to make your own contribution to seat design. Whether it's a

different logo, contrasting fabrics or a unique combination of leather colours, whatever you want it's yours and it's as original as you. The only limit is your imagination.

See your price and specification booklet for details of just how much is available through the Cobra Signature range.

*Signature*

With a choice of visually presented technical materials for the backrest in either pure Carbon or Carbon reinforced aluminium composite, combined with high density precision moulded polyurethane foam, polished stainless steel chassis work and the world's best reclining mechanism at its heart, this seat defines a new category of lightweight reclining sports seats.

The uniqueness of the design lies in the combination of a steel alloy reclining seat base coupled with a composite reinforced backrest, in essence a hybrid of the most advanced motorsport and road seats available today. The coupling of these two parts challenged engineering preconceptions and the solution was found in sourcing the world's finest dual sided infinite recline mechanism with tilt forward memory function and then fusing them to highly polished stainless steel chassis plates each side of the structure.

Stress loading and zoning of the composite backrest to increase torsional rigidity of the structure enabled engineers to produce a stronger and lighter seat than traditional steel framed recliners with a typical 25% weight saving.

After all of this work it would be sacrilege to hide the technology, so right down to the assembly detail of each of the eight individual stainless steel A2 cap screws and washers, the Misano proudly displays its technical heritage.

Settle into it and you become one with the structure immediately almost unaware of its existence, the support is secure but non-intrusive. Finite adjustment of the recline angle and the optimum density of the progressive, perfect form polyurethane foam cosset you in unshamed luxury allied with a hitherto unknown level of lateral support from a seat that feels this good.

# Advanced Composite Engineering

The Misano embodies the genetic synthesis of composite technology and advanced alloy fabrication, manifested in a highly advanced ergonomic design. Add to this the traditional craftsmanship of some of England's finest automotive trimmers and the Misano becomes an art form, truly unique. No other seat comes close.

### Misano Touring

- Reclining sports seat for fast road use
- Silver Carbon Shell

# COBRA

## MOTORSPORT COMPETITION SEATS

Comfort , support and security  
are minimum expectations.  
Unparalleled safety and strength  
are merely standard features.

Adaptability and adjustability are basic rights. We look beyond these simple requirements, attaining a level other manufacturers can only aspire to. Cobra's design philosophy focuses on protection, building a cocoon of safety that communicates and enhances the essential feedback a driver needs to pilot a car to its full potential.

A seat is a fundamental connection to success, an interface between driver and car.

A Cobra seat will become part of both.

Can you afford to  
choose anything else?

TECHNOLOGY®

Outlast

Outlast

# COBRA TECHNOLOGY®

A shell weight that challenges convention. A level of comfort beyond your dreams. Support and location that defies belief and a strength beyond comprehension. Cobra Technology® will redefine your expectations of a Motorsport seat.

**Outlast® Temperature Regulation.**  
The world's finest Motorsport seats are also now the coolest...

### The Origin

Outlast® technology was originally developed for NASA to protect astronauts from temperature fluctuations. The temperature corridor within which a human body feels comfortable is relatively narrow. Outlast technology helps to smooth changes in temperature within this corridor, maintaining a more consistent temperature range.

Outlast microcapsules use phase change molecules to absorb excess heat, providing a cooling system. This heat is stored and if the body then cools, heat is released back to the body as needed. The result is a constant microclimate.

The benefits in Motorsport are without question. In hotter environments, Outlast® technology within Cobra Seats will assist the driver in maintaining a cooler body temperature for longer. In cooler environments, Outlast® will aid in maintaining body warmth.

**Cobra Technology®....a proprietary method for combining the critical elements of some of the world's most advanced materials to achieve the ultimate Motorsport seat.**

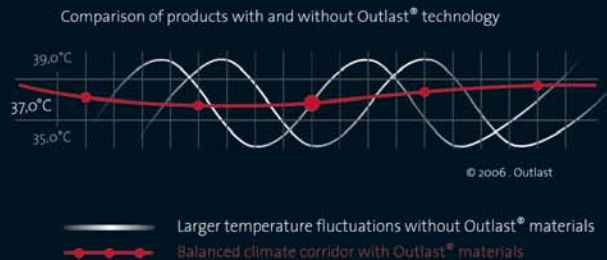

Cobra Technology® is available for the Imola, Suzuka, Evolution and Sebring. Shell construction is a rigid, lightweight and incredibly strong Carbon composite. Internal foam profiling comprises triple layer Confor® foam, a unique energy absorbing and consistent pressure foam that will dissipate energy and evenly mould to a driver's body contour.

Upholstery is the unmistakable tactile feel of Alcantara™ combined with genuine leather for ultimate grip and comfort. The Cobra Technology® system is further complimented by the additional option of an Outlast® temperature regulation system, designed to cool the driver in hot environments, maintain warmth in cooler climates and regulate temperature over longer time periods in the cockpit.

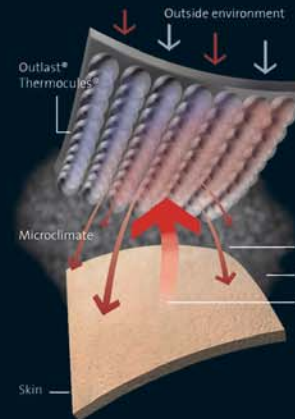

## The Function

- >> Outlast microcapsules absorb excess heat
- >> Stored heat is released back to the body as needed
- >> The result is constant microclimate

### How Outlast® Adaptive Comfort® works

1. Outlast® Thermocules® absorb the excess heat.
2. Stored heat is released to the body as needed.
3. The result is a constant microclimate.

- Fixed back competition seat
- Full composite construction lightweight shell
- Suede Tec grip system on cushions and wear patches
- Maximum side impact protection for head and body
- Hans compatible head restraint
- Suitable for all competition use
- Full 5/6 point harness facility

# SUBFRAMES

Cobra seats are designed exclusively for use with Cobra tailor made subframes. Quality engineered parts with hassle free fitment, designed specifically to mount a Cobra seat into an individual vehicle whilst maintaining the original 'H point' positioning of the driver. Specially adapted frames are

available to convert a side mounted race seat for road use. Cobra tailor made subframes allow for correct and safe use of the vehicles original seatbelt fixings and pre-tensioners where applicable. A huge range of fitments are available, please contact your Cobra dealer for up to date applications.

# UPHOLSTERY SERVICE

## Rear Seat and Trim Panel Upholstery Service

Available within the UK market only, this exceptional service is unique to Cobra Seats. Have your rear seat and door panels collected by courier, re-upholstered by professional automotive trimmers using Cobra's high quality fabrics and leather, to perfectly match your choice of Cobra seats. Delivered ready for installation in the vehicle as a complete package, the upholstery service completes the original factory look incorporating of course, the world's finest seats.
